

KK Mega Glass Crusher

Glass crushers are a necessity in pubs, bars, hotels and restaurants where owners and managers rely on the crushers to free up space used to store empty bottles.

Suitable for high volume bottle disposal

The volume fed bottle crusher can crush 680 bottles in 10 minutes and reduces glass bottle volume by 5:1. The bottle crushers can be used indoors and outdoors.

- Reduce bottle volume by 5:1
- Save on your glass disposal costs
- Reduce your carbon footprint
- Reduces glass to cullet size
- Glass bottle volume is reduced by 80%
- All of the crushed glass can be recycled back into bottles.

The KK Mega Glass Crusher has a built in extraction system which means the bottle crushers can be used indoors and in confined areas. The extraction system filters any fine dust created when crushing bottles. The crushed glass is collected in a 140 litre bin, wheeled inside the machine. Each 140 litre bin can hold 680 bottles of crushed glass.

The KK Mega Glass Crusher can crush up to 4,000 bottles per hour. Existing clients include leading 4 and 5 star hotels. Using a volume fed bottle crusher helps to manage their waste and glass recycling efficiently and effectively.

Why Use a Glass Crusher?

- Reduces glass disposal costs.
- Allows staff to prioritise customer service over moving empty bottle bins throughout the bar.
- Frees up space used to store empty bottles.
- Reduces carbon footprint.
- Reduces the workload for staff, no more segregating bottles.
- Low noise operation and are energy efficient.
- All machines are fully certified and are safe and easy to use.

SPECIFICATIONS	
Height	1920mm 75 19/32"
Width	BB04: 840mm BB06 1085mm BB04: 33 5/64"
Depth	1060mm 44 47/64"
Weight	185kg
Power	220 Volt or optional 110 Volt
Certification	CE Certified. Manufactured to ISO 9001 standards
Finish	Primed and powder coated salt resistant coating.
